- 1:** Headrest helps to provide support and comfort to the head and neck while in a reclined position.
- 2 & 3:** Adjusting the back of your chair, including the lumbar support, will allow you to sit in the most comfortable position for your neck and lower back. The lumbar support helps support your spine and lower back.
- 4:** Raise or lower chair arms so your forearms rest comfortably while working at your desk. Arm pad pivot adjustment provides maximum comfort to achieve proper ergonomic position and adapt to various body sizes.
- 5:** Easily adjust chair seat according to your height. To raise the seat, lift your weight off the chair and pull the lever (on your right) backward; to lower seat, pull lever backward while you are seated. Push lever forward to lock when seat reaches desired height. **6:** You can adjust the depth of your seat to accommodate your upper leg length. Pull lever (on your right) backward and slide seat forward or back. Push lever forward to lock.
- 7:** Increase or decrease the resistance of the chair's tilt depending on your weight. Turn the hand wheel (on your right) to adjust backrest tilt tension; clockwise for more tension, counterclockwise for less tension. **8:** Change the angle of the backrest in relation to the seat. By adjusting the angle you may also be able to ensure the lumbar support rests comfortably on your back. To lock the seat at a particular tilt position, pull the lever (on your left) backward.

Ergohuman

AN ERGONOMICALLY CRAFTED OFFICE SEATING

Advanced Engineering

Ergohuman is based on the Human Engineering Concept, creating a suitable chair for work.

It is designed specifically for those who will be seated in their chair for long period of time in a day. Designed for all-day use and versatility, it is an innovative ergonomic chair that features excellent full-body support and easy adjustability.

With a breathable mesh upholstery that holds up to everyday use, it also allows a wide range of users to easily fit the chair, back, arms and seat to one needs.

ERGONOMIC DESIGN FOR ALL-DAY COMFORT

High Performance

Ergohuman combines a strong set of ergonomic features with a high back and headrest. With its unique two pieces backrest design that features an exceptionally supportive lumbar area and an adjustable headrest for more complete support, this chair can suit many applications and makes a design statement to match its comfort level.

The design allows for adjustment to the chair, and the Automatic Flexible Lumbar Support System helps to adjust the sitting posture in the workplace, achieving a comfortable and safe support for the spine.

Forward Sitting

Upright Sitting

Reclined Sitting

The automatic flexible lumbar support system provides full support to the lumbar region with interactive and dynamic movement. It automatically adjusts the angle of lumbar support for any sitting posture.

AN ECO-FRIENDLY SEATING COMFORTABLY INTUITIVE

Greenguard Certified

The Ergohuman is 97% post-use recyclable. It has Greenguard Indoor Air Quality Certification and meets some of the world's most rigorous and comprehensive standards for low emissions of volatile organic compounds (VOCs) into indoor air.

THE HUMAN SOLUTION

Best Of Its Kind

This stylish ergonomic chair creates the ultimate user-friendly sitting experience. Elevate beyond the ordinary with the Ergohuman chair's stylish, organic curves and incredible comfort.

Designed and made with the total comfort of humankind in mind, this high back office chair is made for a superior alternative to an ordinary office chair, offering a convenient variety of seating postures and adjustments to guarantee optimal long-term comfort.

Ergohuman is a proven favorite among those looking for great ergonomic support and long-term comfort, and has achieved global sales over **800,000** pieces to date.
